Dear @Nigar Fatima,

As discussed, I am aligning you on the **CDP Suraksha Portal** project, on which I am currently working. To ensure a smooth onboarding & clear understanding of the portal, I am sharing all the required project artifacts & access details.

Shared Resources :

Please find attached the complete set of project-related documents, including:

- Workflow & Instruction Manual
- Technical Documentation
- New Guidelines & Reference Documents
- Complete Project Source Code
- Database Dump (for local setup)

I strongly recommend that you **carefully review the workflow and instruction manual first**, as it will help you understand the overall portal structure, role-based flows & existing business logic.

Portal Login Credentials (Role-Based) :

You may use the following credentials to log in & cross-verify real-time data, workflows & role-based mappings within the portal:

1. IA

Mobile: 9774666353

Password: CDPmg@123

2. Farmer

Mobile: 8218809311

Password: CDPmg@123

3. Vendor

Mobile: 8218809311

Password: CDPmg@123

4. CDA

Mobile: 8014425498

Password: CDAmg@123

5. NHB

Mobile: 9999999999

Password: NHBcdp@123

Local Setup & Verification :

Please set up the project in your **local environment** using the provided source code & database.

This will help you:

- Understand the codebase & database structure
- Cross-verify portal behavior with source code & DB entries
- Get clarity on end-to-end workflow execution.

Please find the download links below:

Database Dump:

[Google Drive Link - <https://drive.google.com/file/d/1NSry0aFQAZ-PAD49D1ZwIY485CDcBCeZ/view?usp=sharing>]

Project Source Code:

[Google Drive Link - <https://drive.google.com/file/d/1eMqAQL1fbyeXZ-hiZIPp1hE93IM9TEWj/view?usp=sharing>]

Try to familiarize yourself with the project flow **at the earliest**, as this will enable us to start task allocation smoothly once you are comfortable with the system.

In case you face **any issue at any stage** - whether related to setup, documentation, credentials, or workflow understanding - please feel free to reach out to me. I will be happy to support you.

Looking forward to your quick understanding & collaboration on this project.
